Turning Your Vision to Reality

Biopharmax Group Ltd.

www.biopharmax.com

Introduction

Biopharmax is a global leading design and construction group specializing in the Biopharmaceutical market segment. Our group has been active for over 40 years and has executed over a hundred projects worldwide. We have provided services to the leading pharmaceutical companies in Europe, US, Israel, China and India. Various past projects include world leaders like TEVA Pharmaceuticals, Johnson & Johnson, Merck Serono, Sigma-Aldrich and many others. The group staff has over 150 engineers in all related disciplines: process, validation, machnical, software & control, HVAC & CR, labratories, industrial fields, etc.

Biopharmax has an excellent track record for the best customer satisfaction including most recently; "Abbott Business Performer of the Year 2014" award and J&J Certificate of Appreciation for the leading design of the project in Omrix. We never compromise on the quality and the services provided to the customer. We strive to deliver a our customers a competitive advantage through a resourceful and innovative thinking process. We therefore take deep interest in our customer's business and fear not to challenge all assumptions.

OMRIX Johnson & Johnson

Regulatory Compliance

Biopharmax is committed to comply to the highest standards:

Fully automated plants, compliant to 21 CFR Part 11 and GAMP V
Experience with constructing facilities globally which are approved and complied by USFDA and/or EMEA, Canadian FDA, WHO, China FDA and more.

Services

We provide the following services as part of a dedicated project or on an individual basis:

- Turnkey projects from design to supply commissioning & validation of any part of the plant
- Master planning, conceptual and detailed design
- Project management
- Trouble shooting, inspection, retrofit & fix works
- Services provided worldwide through a global engineering team

Our Partners

Logos of Clients

OMRIX Johnson & Johnson

HTBT

Biotechnology production plant, Insulin crystals and other recombinant products

- 7,500 SQM building
- Process equipment, fermentors
- Upstream, Downstream and final purification
- Clean utilities and general utilities
- Warehouses, laboratories, offices
- Software per CFR21part11
- Complete commissioning and validation
- EMEA compliant

HTBT

OMRIX J & J

Fibrin sealant sterile production plant from Human Plasma

- Production lines, process equipment clean rooms
- Filling suite, packaging department
- Clean & general utilities
- Warehouses, laboratories, offices
- Raw material Human plasma and Cryo
- FDA, EMEA compliant
- Total size: ca. 10,000 SQM

OMRIX Johnson & Johnson

ABBOTT

Process Skids- Feno Penta

- Detail engineering
- Process Skids ASME BPE compliant
- Process Piping
- CE certified electrical control
- 21 CFR compliant Automation and control
- Integration of Process Skid paraphernalia
- Equipment & Utility

ABBOTT

PLURISTEM

Stem cell processing facility
Human Placenta source EMEA Compliant

- 1,400 SQM production site
- Upstream, downstream and filling
- Clean utilities
- Software as per CFR 21 part 11
- Complete commissioning and validation
- Laboratories and Offices
